Hi 👋,

I am Abishek Khanna🤩

I am a dedicated web developer with a strong foundation in HTML, CSS, and JavaScript, committed to building responsive and visually appealing websites. With expertise in Java, I develop robust, scalable back-end solutions to complement my front-end designs. My focus is on creating seamless user experiences through clean, efficient code, and I continuously strive to stay updated with the latest trends and technologies in web development. Whether working on client projects or personal endeavors, I aim to deliver solutions that combine functionality with creativity.

myfile123

```
New-PSDrive -Name Z -PSProvider FileSystem -Root
"\\abistor123.file.core.windows.net\myfile123" -Persist
} else {
    Write-Error -Message "Unable to reach the Azure storage account via port
445. Check to make sure your organization or ISP is not blocking port 445, or
use Azure P2S VPN, Azure S2S VPN, or Express Route to tunnel SMB traffic
over a different port."
}
```

This script will check to see if this storage account is accessible via TCP port 445, which is the port SMB uses. If port 445 is available, your Azure file share will be persistently mounted. Your organization or internet service provider (ISP) may block port 445, however you may use Azure Point-to-Site (P2S) VPN, Azure Site-to-Site (S2S) VPN, or ExpressRoute to tunnel SMB traffic to your Azure file share over a different port.

Note: The script will only work on Windows Server 2012 and above.

Quiz List

Azure Cloud Practice Test -III | 5 Points Each Question

SCORE : 140 / 165

1. Several support engineers plan to manage Azure by using the computers shown in the following table:
   computer :   MacOS Mojave
You need to identify which Azure management tools can be used from each computer.
What should you identify for computer? To answer, select the appropriate options in the answer area.

☐ The Azure CLI and the Azure portal

☐ The Azure portal and Azure PowerShell

☑ The Azure CLI, the Azure portal, and Azure PowerShell

☐ The Azure CLI and Azure PowerShell

2. Several support engineers plan to manage Azure by using the computers shown in the following table:

☐ Yes, No, Yes

☑ No, No, Yes

☐ Yes, Yes, No

☐ Yes, Yes, No

30.
What is used to grant permission to Azure Virtual Desktop resources?

☐ application security groups

☐ resource groups

☐ tags

☑ role-based access control (RBAC) roles
